

Step-1: User name change

Step-2: Create confirmation.txt and copy /etc/passwd

Step-3: Search User name

A terminal window on a Kali Linux system showing the process of modifying a user and searching for it in the password file. The terminal has a dark background with a menu bar at the top (File, Actions, Edit, View, Help) and a title bar (root@kali: ~). The commands and their outputs are as follows:

```
(root@kali)-[~]
# sudo usermod -l ashraful_islam_shohan ashraful

(root@kali)-[~]
# sudo usermod -d /home/ashraful_islam_shohan -m ashraful_islam_shohan

(root@kali)-[~]
# sudo cp /etc/passwd confirmation.txt

(root@kali)-[~]
# grep ashraful_islam_shohan /etc/passwd
ashraful_islam_shohan:x:1002:1002:,,,:/home/ashraful_islam_shohan:/bin/bash

(root@kali)-[~]
#
```
